

Step-by Step setting up your science project in the GulfSeeLife app

1. Register as a
GSL user on
the app or web

2. On the web
portal, click on
Projects

3. Click on this
image to tell us
about your project
idea

4. The GSL team
gives you access
to the project
management
platform so you
can create the
project
description

Create Project

Home > Add content

BASIC INFORMATION *

Title *

Organization

Body
 -Set up your own citizen science project
 -Display your brand and logo
 -Manage who can participate
 -Open the project to all app users or just your team
 -Create a customized data/image/video collection interface
 -Receive notification of data uploads
 -You control the data (easy download!)
 -We help you promote your project
 -Free and easy to use

- No HTML tags allowed.
- Lines and paragraphs break automatically.
- Web page addresses and email addresses turn into links automatically.

List of Users who will have the access to make changes to

[Add another item](#)

5. Title it, describe it,
link to relevant Gulf
species (optional)

6. Add your project logo,
gallery and/or promo or
training video

7. Give access to
other project
managers

Project Type *

✓ - Select a value -
Public
Private

8. Decide who
can see your
project in GSL

Response Mode

✓ - None -
Custom Form
Observations

9. You can create a customized
data form or use the standard GSL
'Add an Observation' format

10a. 'Add an Observation' Format

10b. Customized Data Format

Add Observation
Use this form to report your observations.

What do you want to call this observation?
Give a title for this observation. Ex. Sea Turtles sighting near the bridge

Observation Pictures or Videos*
You can add upto 5 images and/or videos for your observations. Use the button below to upload pictures or videos.

Picture or Video Available Yes, I have Picture/Video

Species Information
Provide any species information you can identify. If you would like some help identifying keys or select "I'm not sure" for suggestions from other users.

Type

Species

[Use the GIS Wizard to identify species](#)

Date and Time
Tell us about the observation date and time

Date (M/D/Y) & Time (H:M)

Location
Tell us about the observation location

Latitude/Longitude

[Get Current Location](#)

Or move the Marker to get location on Map.

Comments or Notes
Is there anything interesting about this sighting you would like to share with the community?

Asks project participants for photos/videos, allows them to identify the species and auto-fills date and location of the photo.

The form designer allows the project manager to create custom fields with responsive rules for data collection specific to each type of project

- ✓ Heading
- Static Text
- Static Image
- Textfield
- Textfield-ReadOnly
- Textarea
- Number
- Dropdown
- Checkbox
- Radio
- Media Upload
- Location
- Address
- Length
- Weight
- Range
- Date
- Time
- Spacer
- Species - All
- Species - Fish
- Species - Beach Mammals
- Species - Invertebrates
- Species - Marine Mammals
- Species - Marine Turtles
- Species - Birds
- Species - Plants
- Species - Sharks and Rays
- Multiple Section Start
- Multiple Section End
